

Tech Talent Accelerator 3.0

AI Skills Framework

Landscape Analysis

2026

The Tech Talent Accelerator is made possible due to support from the Connecticut Office of Workforce Strategy.

Methodology

Terminology

AI-Enabled Job Postings

Include 1 or more AI skills as defined by [Stanford's 2025 AI Index Report](#)

Entry-Level Job Postings

Include job postings that request 0-3 years of experience

Mid-to-Advanced Level Job Postings

Include job postings that request 4+ years of experience

Industry-Cross Cutting Occupation

At least 5 AI enabled job postings in more than 8, 2-digit NAICS industries

AI Adoption by Occupation

- **Pervasive Adoption of AI Skills**
 - Occupations where greater than 50% of job postings are AI-enabled
- **Broad Adoption of AI Skills**
 - Occupations where between 21% and 49% of job postings are AI-enabled
- **Emerging Adoption of AI Skills**
 - Occupations where between 12% and 20% of job postings are AI-enabled

Source

Lightcast

Collects real-time data from over 160,000 sources every day, contributing to a database with over 2.5 billion job postings.

Search Criteria

- **Education and Experience Criteria**
 - Job postings include those that request any level of education (degree) and any level of experience, unless otherwise specified.
- **Timeframe**
 - Past 12 months unless specified otherwise.
- **Region**
 - Connecticut

Key Findings

	National	Connecticut
 <p>Prime Skillsets Impacted by AI</p>	<p>AI is poised to disrupt a variety of skillsets from technology and data related to writing, marketing, and durable skills.</p>	<p>In CT, the top in-demand positions remain tech-focused. Beyond tech, leading AI-enabled roles include business analytics, marketing, and project managers. Employers also emphasize durable skills in AI job postings.</p> <p>Employers have prioritized durable skills like communication, management, leadership and core technical skills like AI, computer science, and data analysis over the past five years. But, demand has declined for skills like research and writing and several technical skills like Apache Spark, Agile, and R, reflecting shifting needs and impact of automation.</p> <p>For the in-demand and fastest-growing skills required for tech roles, driven by AI, see the AI Workforce Consortium ICT in Motion 2025 report.</p>
 <p>Industry Dispersion</p>	<p>The anticipated shift happened, and “most” AI job postings on a national level are outside of the tech industry (49% to 51%)</p>	<p>AI-enabled job postings are increasingly found outside traditional tech occupations (rising from 44% to 56% over the past five years). The top industries seeking AI talent include professional services, finance and insurance, and manufacturing, which are also among CT’s largest sectors.</p>
 <p>Wage Premium</p>	<p>AI skills offer a 28% wage premium across a variety of roles</p>	<p>AI skills offer a wage premium in CT across a variety of job functions: the median advertised average salary for an AI-enabled professional is \$141,000 vs. \$62,700 for a non AI-enabled professional.</p>
 <p>Education Level</p>	<p>Most AI-enabled job postings nationally seek talent with a bachelor’s degree (49%)</p>	<p>Most AI-enabled job postings in the state seek talent with a bachelor’s degree</p>
 <p>Experience Level</p>	<p>Demand for entry-level talent has declined, which could be a product of AI transformation</p> <p>AI-enabled talent is needed across a variety of experience levels</p>	<p>AI-enabled job postings request varying levels of experience with an emphasis on more years of experience</p>

Statewide AI-Enabled Talent Demand

In 2024, Connecticut employers posted over 8,000 AI-enabled job openings: 1.6% of all job postings statewide.

Over the past five years, employers have consistently prioritized durable skills in AI-enabled postings, such as communication, management, and leadership and demand for innovation-related skills has steadily increased. At the same time, requests for skills like research, writing, and sales have declined, potentially reflecting the impact of automation.

“The Business-Higher Education Forum’s mission is the challenge of our time. We must close the gap—the economic gap, the skills gap, and the opportunity gap—but we can only do it together.

We sit at the crossroads of the challenge.”
